

NATIONAL COUNCIL OF
TEACHERS OF MATHEMATICS

June 1, 2014

Dear Dr. Ribeiro, President, of Sociedade Brasileira de Educação Matemática

The National Council of Teachers of Mathematics (NCTM) is proud to recognize Sociedade Brasileira de Educação Matemática (SBEM) as one of our International Corresponding Societies.

NCTM founded International Corresponding Societies as a means to build stronger ties with professional associations of mathematics education in other countries. Through this process NCTM agrees to:

1. Acknowledge Sociedade Brasileira de Educação Matemática as International Corresponding Society of the Council and link to your website.
2. Offer one (1) free annual meeting conference registration to an official representative of the corresponding organization.

International Corresponding Societies of NCTM are recognized for terms of five years. As leadership changes please send updates to me at dbarnes@nctm.org.

Included is a PDF of the certificate which will be mailed to you as well. These can take some time to be delivered.

You will also receive information on NCTM's 2015 Annual Meeting and Exhibition in Boston, Massachusetts, April 15-18, 2015 this fall. If an official representative from your organization plans on attending, please let me know so that a complimentary registration can be processed. (This does not include travel, room and board.)

We welcome you and I look forward to the opportunity to meet you in the future.

Sincerely,

A handwritten signature in black ink that reads 'David Barnes'.

Dr. David Barnes,
Associate Executive Director for Learning, Research and Development.
National Council of Teachers of Mathematics
